

## News Bulletin

In December of 2002, JASC signed a Long Term Agreement (LTA) with Hamilton-Sundstrand San Diego to continue supplying JASC production components for the Hamilton-Sundstrand APS-3200 Auxiliary Power Unit (APU). The APS-3200 APU is used on the Airbus A-320 commercial airliner, and supplies electrical power and air conditioning while the aircraft is on the ground.

The components that JASC supplies for this APU include: [servo valves](#), [inlet guide vane actuators \(IGVA\)](#), [pressure regulators](#), [flow dividers](#) and small filter assemblies.
